

Radars Safety Sandal

Black (001)

Art nr: 1000063

Previous art. nr: 10063401

Monitor Radar is another new member of the Dynamic family! Radar is a new sporty safety shoe made with injection technology and has a ventilated microfibre upper with large ventilated areas on both sides. The outsole is made of dual-density polyurethane, the midsole has a softness of 50 Shore A and, together with Monitor's SS 2.0 insole, produces an immensely comfortable and cushioned shoe, despite the slim outsole. Radar has a new type of lacing where we combined the classic hook-and-loop fastener with a comfort lacing solution, which makes the shoe comfortable to wear and allows the shoe to be put on and taken off easily. The shoe interior is in moisture-absorbing fabric. The toecap is made of composite material and the penetration resistance of soft APT.
