

DOCUMENTS RELATED TO INSTALLATION under EN795:2012 §7.1

Anchorage devices may only be installed by competent persons or organisations.
After installation, this document must be given to the operator and must be kept for periodic inspections of anchorage devices.
Installation must undergo appropriate checks, by calculation or testing, for example.
If the system's marking cannot be accessed after installation, we recommend placing additional marking near the device in question.

Location of installation

Client name: _____ Tel: _____
Address: _____
Building and location of the installation: _____
Identification of the installation (order number, project number, etc.): _____

Installer

Company name: _____ Tel: _____
Address: _____
Name of the person in charge of the installation: _____

Installation

Manufacturer: KRATOS SAFETY _____ Tel: +33 (0)4 72 48 78 27
Address: 689 chemin du Buclay - 38540 Heyrieux - France
Standards: EN795:2012 _____ CEN/TS 16415:2013 _____ Type A _____ Type C
EN353-1:2014 _____

Model	Serial number	Batch number	Manufacturing date	Purchase date	Date brought into service	Device no.

Characteristics of the receiving structure

Materials: _____ Dimensions: _____ Quality: _____
(Example: concrete quality, rafter dimensions, sheet thickness, etc.)

Fastener characteristics: (document the installation with photos of the assemblies made)

Type: _____ Dimensions: _____ Quality: _____
Mounting depth: _____ Manufacturer: _____
If required, type of tests performed: _____ Permissible tensile and transverse forces: _____

Schematic of the installation

Attach a schematic of the installation to this document with all relevant information for the user, such as the position of the anchorage points.
Also attach all documents needed for subsequent checks (plans, photographs, etc.), including items that will no longer be visible once the installation is completed.

The responsible installer declares that:

- the system was installed according to the installation instructions from the anchorage device manufacturer and the fastener manufacturer;
- the system was positioned according to the installation plan;
- the system was fixed on the specified support;
- the system was fixed as specified;
- the system was put into service according to the information provided by the manufacturer;
- the system was provided with the necessary information (photographs, plans), especially when the fasteners and receiving support are no longer visible once installation is completed;
- the system was installed according to standard practices (respect of distances from the edges, examination of the support point, proper cleaning of holes, respect of setting times and implementation temperature, respect of the fastener manufacturer's instructions, etc.)

DOCUMENTS RELATED TO PERIODIC INSPECTION under EN795:2012 §7.1

Name of the company and the competent person responsible for the inspection

Company name:

Tel:

Address:

Name of the competent person:

Identification of the installation (order number, project number, etc.):

Control points: Refer to the list of control points on the instructions associated with the system

For the inspection, you must make sure to have the following documents: Usage and installation instructions, calculation sheet (if applicable), structural anchor test reports (if applicable), installation documents.

Inspection report (example of inspection record)

We recommend that you document the inspection with an inspection report and photographs.
